

REACTION

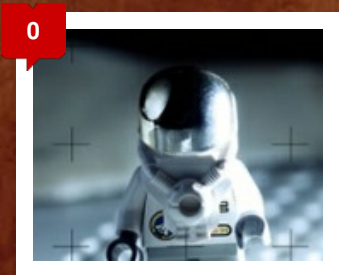

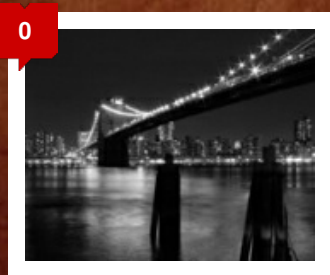

POWER

An Individual chronological journal
of thoughts, expressed freely to all.¹

Reaction is founded on the fresh, contemporary
framework *Gantry*, with features such as the 960 grid
system and a totally redesigned administrative
interface.

Gantry: The Brand New, Powerful and Intricate Framework / Platform from the RocketTheme Team

The new **Gantry Framework** allows for a much more efficient, more powerful
underlying system; that can transcend to other platforms with ease. The main
features of Gantry are its 960 Grid system, and its advanced administrative control
panel, with a vast assortment of other features ready to enhance your Joomla
experience.

Style Variations: 6 Excellent Styles, in 3 Background and Body Levels, High, Medium and Low Intensity.

Reaction has 6 preset styles / style variations and **18** combinations. Each preset style has 3 background levels: **Low, Medium & High**, which represent different levels of detail, making Reaction both a graphically intense, but graphically reserved template. You can edit the combinations in your template as outlined on the [Style Control](#) page.

Extensions: A Diverse and Functional Range of both Integrated RocketTheme Extensions and 3rd Party Addons.

Extensions are an integral part of any Joomla site, and template sided integration of popular addons is an important step on theme development. Therefore, as is tradition with our template releases, we have styled integration of many of our extensions such as *RokTabs*, in conjunction with a 3rd party component:

Navigation: Setting the Standards for Joomla Menus, from the Advanced Fusion Menu to Traditional Alternatives.

Fusion, the default, but most powerful, menu is the central navigation system of Reaction. Javascript and advanced styles make it a complex, efficient and functional dropdown system. Other options are available such as Splitmenu, a non-js version of Fusion to a Suckerfish only mode for Internet Explorer 6.
